

One monthly price. No per-person fees. No hidden extras.

A plain note you can keep. The exact figure, sites and hardware list are agreed in person and written into the contract. Nothing is purchased on a website.

MarosHub is workforce time, weekly rota and payroll for sites in the United Kingdom. Staff clock on an Android phone or Android tablet. You do not buy extra door readers, Salto hardware, or a wall terminal that costs tens of thousands to install. Rota and payroll sit in the same monthly price.

01 A fixed monthly price — not per person

Other firms charge per employee, per fob, per punch, then add setup fees and extras you only see later. We do not. You pay **one agreed monthly amount** for the site (or sites) named in the contract.

Unlimited people on that site

Hire ten more staff and the monthly price does not move. There is no extra fee per member, per PIN, or per fob once the site is on the contract.

Rota and payroll included

Weekly rota, the clock (PIN, FOB, or rota-only), and payroll files in the software UK accounts teams already use: Professional Payroll Sheet, Sage 50 Payroll, Xero Payroll, QuickBooks Payroll, BrightPay and PayFit. Not add-ons.

No hidden costs

No per-head licence. No surprise reader fees. No “go-live” invoice for tens of thousands. If it is not in the contract, we do not charge it.

WHAT OTHER FIRMS OFTEN DO

Charge per person, then more as you grow

Tens of thousands to install readers, Saltos or wall clocks

Rota or payroll sold separately, extras in the small print

Price can move after you are locked in

WHAT WE DO

One fixed monthly price — unlimited members per agreed site

Clock on a phone or tablet. No extra readers

Rota and payroll included in the same price

First businesses: three-year cap — we will not raise the agreed monthly price

02 I install everything in person

I come to the agreed sites. I pair the devices, lock Fully Kiosk where a kiosk is used, pair NFC fobs if you chose FOB, and confirm staff can clock. You do not get a box in the post and a PDF.

You supply the hardware

You buy or already have compatible Android phones or tablets (and NFC fobs if you want FOB). I attend and install. No hardware invoice from us.

I supply the hardware

You send a **one-off** bank transfer for the agreed devices, licences and mounts. I buy and prepare them, install them on site, and give you a **receipt**. Hardware is not ordered on credit.

Either way, installation is in person. The monthly subscription is separate from that one-off hardware payment. Direct bank transfer only — standing order, Faster Payments or BACS. No card, cash, PayPal or payment link.

03 Three-year price cap for the first businesses

For the first businesses we take on, the subscription agreement is written for **three years at the monthly price we agree**. That price will not be changed during those three years.

After the three years: if the cost of keeping the software running is at the same level, **the monthly price stays the same**. If maintenance costs have moved in a way that cannot be absorbed, we talk before anything changes — we do not surprise you on an invoice.

04 Discussed in person, adjusted if needed

The monthly figure, which package (PIN, FOB, or rota-only), how many sites, and whether you supply hardware or we do, are all talked through with you on site. If something needs to change before you sign, we adjust it. The contract then records what we agreed. Nothing is locked in from a webpage.

In short: one monthly price, unlimited people per site, rota and payroll included, phone or tablet at the gate, I install in person, hardware only if you want it and pay once up front with a receipt, three-year price freeze for the first businesses, and no hidden extras.
